## Junior Web Developer

A full-stack certified developer with a background in graphic design and art. Motivated to start a path in tech a year ago after years of working with Amazon's internal data tools. Passionate about computer science, data, analytics, innovation, and learning new things on top of doing art. Able to learn new technologies as fast as learning a new foreign language. Excited to apply these skills to creating a better experience on the web.

### SKILLS

---

- |                                     |                              |                     |
|-------------------------------------|------------------------------|---------------------|
| • HTML/CSS                          | • SQL                        | • Google Tools      |
| • Bootstrap/tailwind                | • MongoDB                    | • Foreign Languages |
| • JavaScript                        | • Java                       |                     |
| • JS libraries: JQuery, React, Node | • Python                     |                     |
| • Express                           | • MS Excel, Word, PowerPoint |                     |

### WORK EXPERIENCES

---

- Worked in the "Problem Solve" team to ensure quality products are sent to customers in a timely manner.
- Took on a leadership role while facilitating high morale.
- Registered faulty items and replaced them using Amazon's data tools.
- Mastered Amazon's internal tools for package management within a short period.
- Worked with workflow spreadsheets to track daily shipments.
- Fixed device issues: scanners, printers, etc.

#### Fulfillment Associate

Amazon DPH2

**2019 – 2020**

King of Prussia, PA

- 
- Trained new hires and cross-trained associates in the "Problem Solve" team.
  - Trained new site managers in outbound "Problem Solve" processes.
  - Promoted and facilitated Amazon's code of conduct to ensure safety.
  - Assisted managers by participating in leadership meetings and helping on-the-ground workers when needed.
  - Performed role audits, new-hires audits, and other audits associated with performances.
  - Helped establish CampusShip onto the station.

#### Learning Ambassador

Amazon DPH2

**2020 – 2021**

King of Prussia, PA

- Ran introductory classes for new-hires and helped with onboarding.
- Cross trained associates in “Problem Solve” procedures and other crucial roles on the pick-up driveway, as well as safety protocols.
- Registered faulty items and replaced them using Amazon’s internal data tools.
- Performed accuracy check on completed works.
- Read metrics and time-tracking to ensure daily operations are running smoothly.

## **Learning Ambassador**

Amazon DDP2

**2021**

Philadelphia, PA

## **PROJECTS**

---

### **Weather Dashboard**

App that enables users to view that particular city's weather forecast for up to 5 days. It relies on the third-party Weather API call to retrieve the weather data by making requests with specific parameters to a URL.

#### **Technology:**

- HTML, CSS, JavaScript, JQuery, Moment.js, Bootstrap, and Weather API.
- JSON and local storage.

#### **Links:**

Deployed: [binnie51.github.io/weather-dashboard/](https://binnie51.github.io/weather-dashboard/)

Github Repo: [github.com/binnie51/weather-dashboard.git](https://github.com/binnie51/weather-dashboard.git)

---

### **Movie Watchlist**

A front end app where users are able to create a personal watchlist of movies they wish to see. Databases are streamed from existing third-party APIs, this case being: IMDb and OMDb.

#### **Responsibilities:**

- Breaking down group tasks by dates using non-traditional project management tools such as Discord server. Creating wireframes and styling the pages. Populating the modal pop-up with data and adding closing features.

#### **Technology:**

- HTML, CSS, Javascript, JQuery, Materialize css, IMDb & OMDb APIs.
- JSON and local storage.

#### **Links:**

- Deployed: [binnie51.github.io/movie-watchlist/](https://binnie51.github.io/movie-watchlist/)
  - Github Repo: [github.com/binnie51/movie-watchlist](https://github.com/binnie51/movie-watchlist)
- 

### **CodeOp (Front End)**

A full-stack app where nonprofits could provide a space for real-world experiences through projects for both experienced and inexperienced developers to showcase their expertise. The site is built using the MVC architecture pattern. Agile methodology was also exercised throughout the developing process.

#### **Responsibilities:**

- Leading front end development. Creating wireframes and graphic images, determining color scheme, and designing app logos. In charge of home, login, and dashboard handlebars.

#### **Technology:**

- HTML/CSS, JavaScript, JQuery, and Bootstrap on the frontend.
- MySQL, Sequelize, Express.js and Node.js on the backend. Insomnia for testing.
- Express-session ID within cookie. Faker.js for generating fake contextual datas.

**Links:**

- Deployed: [binnie51.github.io/movie-watchlist/](https://binnie51.github.io/movie-watchlist/)
- Github Repo: [github.com/cpaschall/codeOp](https://github.com/cpaschall/codeOp)

**EDUCATION**

---

Graduated 05/2018

**Associate of Arts: Art and Design**, Community College of Philadelphia - Philadelphia, PA

**COURSES & TRAININGS**

---

Graduate 08/2022

**Certificate for the completion of Coding Boot Camp**, University of Pennsylvania - Philadelphia, PA

**FOREIGN LANGUAGES**

---

- Indonesian Native
- Japanese Upper-Advance
- Chinese Upper-Beginner
